## PROFESSIONAL EXPERIENCE

### Senior Software Engineer

March 2022 - Present

Poste Italiane S.p.A.

#### NuovaAreaComunicazione

Designed and developed a scalable cloud-native platform for customer communications, reducing massive delivery times by 70% (from over a week to less than a day) for 40M+ users.

Improved customer experience by enabling faster access and efficient search of communications.

Technologies:

- **Python** for AWS Lambda; **Java (Springboot)** for microservices running on **OCP** Cluster; **GoLang** SMPT microservice running on **AWS ECS**; **OpenSearch** as search engine where to ingest and search the communication; **AWS SQS and SNS** asynchronous components communication

#### SmartCatalog

Designed a web platform to visually manage Poste's commercial offerings, structured as a graph of nested offers and products.

Enabled internal teams to explore and configure complex product hierarchies more intuitively, improving efficiency and reducing errors.

Technologies:

- **Javascript + Typescript** (SvelteKit v4 + Tailwind) for the UI.

#### DataProducts

Developed a data pipeline to make customer interaction data (e.g. product subscriptions, post office usage) easily available to business and analytics teams.

Used CosmosDB with CDC and EventHub to stream events processed by PySpark notebooks on Azure Databricks, organizing data into Bronze, Silver, and Gold layers with Delta Lake.

Technologies:

- **Azure Databricks, PySpark, Delta Lake, EventHub**

### Software and Data Engineer

April 2020 - March 2022

Enel Global Services S.R.L.

#### Enel X IoT Devices Platform

Developed microservices for the Enel X IoT platform, enabling device management and data processing.

Used modern async communication and cloud-native patterns to ensure scalability and maintainability.

Technologies:

- **Python (FastAPI + Beanie); MongoDB; Kubernetes; gRPC; Kafka**

#### Machine Learning Factory

Developed an internal ML platform on AWS to streamline data preparation and model training workflows for data scientists.

The platform standardized and automated critical steps—such as preprocessing, orchestration, and model deployment—enabling teams to accelerate prototyping and scale productivity across the organization.

Technologies:

- **AWS Stepfunctions, Lambda, SageMaker.**

#### Common Data Catalog

Built and maintained a corporate catalog of AI models to support discoverability and reuse across teams.

Technologies:

- **Javascript (Angular 9); Java (WildFly)**

### Software Engineer

April 2017 - April 2020

Accenture Technology Solutions S.R.L.

#### AVS – Accenture Video Solution

Contributed to the development of AVS, Accenture's streaming platform offered to enterprise clients.

Designed and maintained a Node.js middleware layer using Express.js, which orchestrated backend microservices and simplified API integration for frontend applications.

This abstraction layer improved scalability and reduced coupling between clients and backend systems

Technologies:

- **Javascript + Typescript (NodeJS + Express.JS), Chai, Mocha**

#### CloudNative Solutions

A series of PoC to build application on AWS

Technologies:

- **Jenkins; AWS SAM; AWS Cloudformation; Lambda (NodeJS); API Gateway; DynamoDB**

## PERSONAL PROJECTS

### Dwelly

Co-founded and actively develop Dwelly, a platform designed for condominium management.

It provides administrators with a management dashboard to handle buildings, residents, payments, and communications.

Residents can use a dedicated mobile app to receive messages, submit reports, and pay service fees.

I focus on the web application and infrastructure layer, ensuring scalability and maintainability.

Technologies:

- **Javascript + Typescript (SvelteKit v4 + Tailwind); Kubernetes on OVH; Jenkins**

### OSS

I actively support and contribute to the open-source community.

I frequently rely on OSS libraries in my work and, whenever possible, give back by reporting issues, improving documentation, or submitting patches and features.

## EDUCATION

### CdL Ingegneria

### Informatica e Biomedica

UMG Catanzaro, CZ

2012 - 2016

## CERTIFICATIONS

### AWS Certified Developer -

### Associate

2019

### Certified SAFe 4

### Practitioner

2018

## LANGUAGES

Italiano/Native

English/Fluency

## TECHNICAL SKILLS

### LANGUAGES

Python · Java · Javascript ·

Typescript · Go

### FRONTEND

SvelteKit · React · Angular ·

Tailwind CSS

### BACKEND

FastAPI · Spring Boot ·

Express.js · Fastify · Ginonic

### CLOUD PLATFORMS

AWS · Azure

### DEVOPS & INFRASTRUCTURE

Docker · Kubernetes ·

OpenShift · Jenkins

### TOOLS & COLLABORATION

Git · GitHub · Bitbucket ·

Gitlab

### DATABASES & SEARCH ENGINES

MongoDB · DynamoDB ·

CosmosDB · OpenSearch

## HOBBIES

Home automation (Home

Assistant, DIY projects) ·

Travel and cultural

exploration · Strategic video

games
